

Professional Production Facility

We are one of the carefully selected manufacturers of the Guardian™ Warm Roof system and have demonstrated our commitment, by investing in equipment, training and by building a specific infrastructure to produce all the Guardian™ Warm Roof products to the very highest standards.

Quality Control

Every element of the Guardian™ Warm Roof System has been tested and approved during the extensive research and development process and we have been appointed as fully qualified manufacturers, authorised to build and produce the Guardian™ Warm Roof system.

- ✓ All Guardian™ Warm Roofs are designed and fabricated to exact building standards
- ✓ Each roof is built to completion on our factory floor prior to despatch.
- ✓ Every single component is carefully labelled and packed for ease of installation when on site.
- ✓ We have our own dedicated training school for Team Guardian™ members to ensure that all installations are consistent.
- ✓ All Guardian™ Warm Roofs leave our facility ready for installation, including all fixings and insulations.
- ✓ We can offer full technical support and on-site assistance with your first installation.
- ✓ Team Guardian™ members have access to all Guardian™ Warm Roof marketing and advertising assets, free of charge.

Guaranteed Excellence in Fabrication
